

1. Filter, gen responses

5. Add the synthetic conv to pool

Seed Pool

2. Sample a conv

(prompt_s, response_s)

3. Calculate **KNN** for the sampled conv

(prompt, response)

..........

[Exemplar Dialog k]

4. Prompt to synthesize a new conv

(prompt_k, response k)

(prompt 1, response 1)

(prompt 2, response 2)

[Exemplar Dialog 0]

The passage above shows several dialogs between a human user and the AI assistant. Now perform the following task.

Task: Position yourself as the user in question.....
